

# COMPTES RENDUS MATHÉMATIQUE

Tome 357 (2019) – N° 6 – juin

---

Fenêtre, 1976, détail, Éric Hallberg ©, né en 1933.  
Fenêtre, 1976, detail, Éric Hallberg ©, born in 1933.

---

## **Théorie des nombres/Number Theory**

- Non-Wieferich primes under the abc conjecture  
**Yuchen Ding** ..... 483

## **Analyse complexe/Complex Analysis**

- (voir tome 357, série I, 2019, p. 528)

## **Équations aux dérivées partielles/Partial Differential Equations**

- Analysis and boundary value problems on singular domains: An approach via bounded geometry  
**Bernd Ammann, Nadine Große, Victor Nistor** ..... 487
- Local indirect stabilization of N–d system of two coupled wave equations under geometric conditions  
**Chiraz Kassem, Amina Mortada, Layla Toufayli, Ali Wehbe** ..... 494
- Stabilization in three-dimensional chemotaxis–growth model with indirect attractant production  
**Ya Tian, Dan Li, Chunlai Mu** ..... 513

## **Contrôle optimal/Optimal Control**

- (voir tome 357, série I, 2019, p. 494)
- Generic singularities of the 3D-contact sub-Riemannian conjugate locus  
**Benoît Bonnet, Jean-Paul Gauthier, Francesco Rossi** ..... 520

## **Géométrie/Geometry**

- (voir tome 357, série I, 2019, p. 487)
- Homotopic equivalence of rational proper holomorphic discs of bounded symmetric domains of type I  
**Aeryeong Seo** ..... 528

## **Géométrie algébrique/Algebraic Geometry**

- Corrections to “Singular Hochschild cohomology via the singularity category” [C. R. Acad. Sci. Paris, Ser. I 356 (2018) 1106–1111]  
**Bernhard Keller** ..... 533

Continued on the next page

Contents (continued)

**Géométrie différentielle/Differential Geometry**

- (voir tome 357, série I, 2019, p. 520)

**Probabilités/Probability Theory**

- An exponential inequality for suprema of empirical processes with heavy tails on the left  
**Antoine Marchina** ..... 537

**Statistique/Statistics**

- (voir tome 357, série I, 2019, p. 537)

**Analyse numérique/Numerical Analysis**

- Exponential decay of the resonance error in numerical homogenization via parabolic and elliptic cell problems  
**Assyr Abdulle, Doghony Arjmand, Edoardo Paganoni** ..... 545
- Incorporating variable viscosity in vorticity-based formulations for Brinkman equations  
**Verónica Anaya, Bryan Gómez-Vargas, David Mora, Ricardo Ruiz-Baier** ..... 552
- Sparse approximate solutions to stochastic Galerkin equations  
**Christophe Audouze, Prasanth B. Nair** ..... 561
- Sur la distance à l'instabilité de polynômes matriciels quadratiques  
**Alexander Malyshev, Miloud Sadkane** ..... 571

**Problèmes mathématiques de la mécanique/Mathematical Problems in Mechanics**

- Thin layer approximations in mechanical structures: The Dirichlet boundary condition case  
**Frédérique Le Louër** ..... 576
